AF-6 Series AC Drives: Built-In Features. Built-In Simplicity.

AF-6 Series drives range from 1/3 to 1350 HP, each in a compact package, each with a host of built-in features that heighten performance, reduce energy consumption, simplify installation and eliminate the need for many costly add-ons. With the AF-6 Series, you get a drive already in tune with your application, in the most cost-efficient and space-efficient manner possible.
